So, i've been playing this game for some consecutive hours and i must say: this is a masterpiece.

I would totally buy it for a bigger price. 10/10. Lots of potential but too frustrating to be fun. You'll die a lot, and every time you die you have to go through the same dialogue lines and the same early missions. I liked the idea of trying to keep a clunker of a spaceship operating with lots of complicated tasks, but the practical outcome always seemed either too easy or too hard. Either you'd cruise through a mission without real danger, or you'd end up surrounded by aliens you can't see because your screens are covered in goo, with everything broken and no chance to fix it all.

Needs re-balancing.. Best game ever. Do not buy if you do not like playing by using the keyboard.. Meh, without the trading cards I wont be wasting my time on this empty game ~~

I would like to start off by saying that this game is just not good. Story doesn't make any sense at all, there's no run key, and it's not even scary. It's more of just suspense than it is scary. Thank god I only paid \$2.39 for this game because it is crap.. Is a okay game and for the price isn't bad. However, I can't handle that it doesn't have a "repeat" button and going back to the main menu is just annoying for me.. Been looking for this game for ages after I lost my original installation cd several years ago. Finally here!

One of my absolute favorite strategy games. Still great fun to play! Recommend the campaign mode.. Nice difficulty progression and overall this is an ok little reflex game. The feeling of speed is the best part. That said this all felt pretty basic. The levels are all completely flat and the graphics are simple to the point of being lazy. No mouse support is super annoying and it makes keyboard players feel like second class citizens. Clearly this was meant to be played with a gamepad.. A perfect intellectual game! Depicts the epoch very good, Absolutely necessary to read the manual, though.
