I cannot give this game a good review even though i do like a good twin stick shooter which this sadly is not, the main problem is you cannot see what the hell is hitting you half the time, you can shoot a big asteroid from half a screen away and the bits that fly off come straight to the side of you every time its stupid and really annoying.

The levels which have planets you cant see enemy missiles clearly enough or enemies for that matter, the side of the arena is hard to tell where it ends so you end up stuck sometimes and trapped.

The way the upgrades work is not really explained some are useless so a lot of trial and error will be needed, buy the wrong one at the wrong time and you will get stuck unable to progress.

If you are patient and don't mind really hard games look for it in the sale you may get a few hours out of it there are some good things about it like the music and for the money you get a lot of levels and they do vary.. Wonderfully drawn, spooky point & click adventure.

Sports some very nice tongue-in-cheek humour as well.

As other reviewer have stated it is not a very long game, but makes up for it with a very nice atmosphere (both visually and with its soundtrack). It did not get dull or stretch its ideas, so it felt right to me.

I had a very good time with it and can recommend it to everyone.

If you would like to try something out of the ordinary, go for it!. Part of my "How many games can I get for \$5" review series in alphabetical order. #1 of ~69

The first boot crashed, setting the tone for the game. Given what I paid for this pile of games I really shouldn't be too critical of this pile of crap. Here's the deal. This game sucks. The sounds are nothing to write home about. The music is absolutely horrid. As far as soundtracks go, this one did not fit the game in any way shape or form. The pixel art is fun, but the pace of movement and controls are horrid. The general feel of the game is something someone cut up and sewed back together.

I can not recommend this game at full price, but given I paid a few pennies for it I can safely say it isn't too painful to get on sale or with a coupon. I will eventually re-visit it and dive deeper into this pile of waste matter, but for the sake of the series I have to move on for today.

For now, thumbs down. Pending revisiting to see if it has any sort of playability that I missed hiding somewhere in the game..

This is one of the worst experiences of my life i now know how it felt to be the pig David Carron abused.

I recommend this game to gypsy farmers who work on a loney Sunday morning when others are out playing sunday league, this game is the epitome of the EA servers and Rich Homie Quan attempting to speak english.

First of all the graphics are as useful as a homeless guy to big business law firm, the gameplay looks as if it was made in 1920 and the title screen is able to give anyone a seizure.

BTW i only played 5 mins.. filled with TKs, impossible to tell between friend and enemy.

Games had a far way to go. A FAR WAY.. tl;dr: It's garbage. After playing for less than 3 minutes, it was extremely evident that this game wasn't good.

In short, your weapons do no damage. You'll be in standing toe-to-to with an opponent, slashing wildly at them and shooting from point-blank range, and all you're doing it just chipping away at their health. Besides that, all you do is run and jump around trying not to get cornered and killed.

When I tried to exit the game, it locked-up and froze. I immediately uninstalled this garbage.

Don't buy this, even if you're curious.. In all honesty, its not bad. not 20 bucks worth of hard earned money good...but still decent for early access. I hope the devs fix the few kinks with the combat system, although i do like the firearm mechanics. I'm gonna give it a thumbs up because i do what i want.. Not so good how i wonder be like but is cheap and is another game in my ♥♥♥♥ing library.

This game has great potential but, there are a few things that could make this gaming experience a whole lot more enjoyable. Firstly the day should be twice as long for the players to perform the actions provided; mining rocks, chopping trees, placing defenses and more. One more thing i think this game could benefit from is more rounds that slowly become more difficult so the player has more time to adjust. Playing the game for myself I had these issues and it less fun then it could have been. This is just my opinion but, it would be great if an update could become available.. A mildly entertaining distraction, but I'm pretty sure this will never be finished. I'll take down this review if it happens, but I'm not holding my breath.. I had to go to the hospital for my eyes to get removed after clicking the "Play" button. The Launcher is the worst, gameplay feels like a horse trying to pee into a condom and it's just bad overall. Honestly just do what the comments say and play Warthunder. Also why would i pay 20 dollars for a ♥♥♥♥♥♥ game dlc that dosent even come in steam format. Game Devs, plz remove this game from steam because every time i look into my steam library, i see that game there.....

I have been playing Warthunder for about 500hrs and i enjoy all of it.

I have been playing HIS (or known as HIV) for 4 minutes and my balls have dried up and dropped off.

Just don't play this game.. Incomprehensible.... Thank you for this bad, bad piece of software.

The Adolf Hitler achievement and the Heinrich Himmler achievement will gracefully decorate my profile.. I've always wanted to play this, but tracking down a copy was difficult and I wasn't going to resort to pirating it. Luckily Steam had it in their stores and it was worth every cent! Trust me on this; it's a timeless classic that still holds up to the games today!. legends of quana epic track. Best game ever. Soooooo fun

Nightmare reminds me of Nazi Zombies and is fun to reply due to the fact you unlock more from getting points

The Bedroom is an awesome puzzle and so tense

Ethan Must Die is a really fun game mode, so much replayability. Just gotta be careful

Buy this for a good time
